CMI Anchor Sling

The CMI Anchor Sling is a simple, versatile, and adjustable sling that you can trust. Made from heavy duty nylon webbing with stitched pockets for an easy and safe connection.

Comes in 3 sizes for ultimate versatility

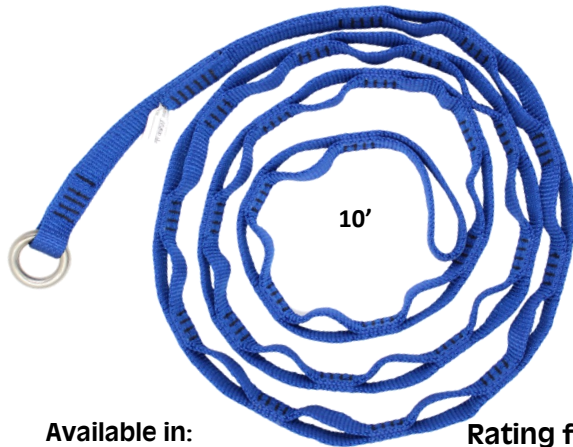

Created by a climber for climbers

Original design by Gerry Garcia

Base Anchor Sling

Wrap the sling around the base of the tree in a choking configuration with the webbing going through the stainless steel ring, avoiding fiber on fiber contact for longevity. Always clip a ring on the first available pocket to keep a snug connection. Once clipped in, choose a pocket to clip in your climb line. Always be sure to clip into 1 pocket, not 2. The options are endless with this sling; connect straight with a carabiner, or add your favorite lowering device for an easier rescue in the event it's needed.

Available in:
10' Blue only
15' Yellow only

Rating for all Slings.
Pocket Strength: 2,000 lbs.
Overall Strength: 10,000 lbs.
Stainless Steel Ring rated: 16,400lbs.

Canopy Anchor Sling

What we believe to be the perfect size: 40 inches

Use it as a false crotch redirect in a choking configuration to tie into that perfect place where a natural crotch isn't available. With the same sewn pockets as the larger anchors, it gives you the option to pick your right length with no knots. You can also add a carabiner to a pocket or your favorite pulley to create a low friction cambium saver in a cradle or choked off limb. This sling will quickly become a go to on your saddle.

Available in:
40" Orange only
